

Radiation Photos

Before First Treatment (Flash didn't work)

After first treatment (225 Centigrade)

After one week

After two weeks

After three weeks

After 4 weeks

After 5 weeks

After six weeks (burned areas covered with Silvadene).

“Having used the Bosom Buddies treatment pads for six weeks, there was very little burning until the last 2-3 treatments. At that point, Silvadene cream had to be applied to a very small area. The use of Bosom Buddies along with follow-up Aquaphor on a daily basis helped prevent any real irritation or reddening for almost the entire course of therapy, a very intense course because of the small field of radiation.”
